EDUCATION

Our education solutions are cost effective, mobile and relocatable.

Our classrooms are cool in summer and warm in winter.

This means it is a very flexible and adaptable solution and ideal for remote locations where there is an urgent need for educational infrastructure.

Education should be the top priority for both public and private sectors to groom future talent and aid with economic growth.

Our educational units include:

- Standard classrooms
- Science & Technology classrooms
- Libraries
- Ablutions
- Kitchens and feeding centres
- Grade R classroom
- Administration

Prefabricated modular clinics are designed and constructed with high building safety, taking into consideration the intensive utilisation, in addition to ergonomic area design and hygiene structures. ZMP's modular units work with a wide range of industry specialists in specifying solutions specific to the healthcare sector.

Prefabricated Modular Clinics

Our healthcare modular buildings are manufactured and assembled according to international standards and have sections such as a reception area, waiting area, staff area, consultation room, doctor room, safe room, record room, counselling room, ablution blocks and water harvesting systems. Internal features are fire resistant blinds, air-conditions, non-slippery carpets and a spacious waiting room.

We work alongside industry professionals that understand the requirements specific to various applications in the healthcare sector to ensure that we deliver the correct solution to maintain our ethos of excellence.

Our full range of specialist healthcare solutions can be tailored to suit your requirements.

Modular buildings offer quick, affordable and long lasting solutions that can meet the demand in this sector with very short lead times.

We have successfully designed, manufactured and erected a wide variety of units for this sector including:

- Anti-Retroviral clinics
- Multipurpose clinics
- Maternity Units
- Crisis centres
- Bed wards
- TB wards
- Eye Clinics

GENERAL BUILDING & CIVIL WORKS

Zingaka is a general building and civil works contractor in both the private and public sectors. Zingaka's broad range of disciplines include

- General building construction and maintenance of schools, clinics, community halls, ablution blocks, sport fields and low-cost housing.
- Bulk earthworks.
- Electrical infrastructure.
- Road maintenance .

This division also adds value through innovative packaging: build-operate transfer (BOT) contracts, design and construct and alternative solutions tailored to meet client requirements.

We work with you directly as full project management partners, or with your professional team of architects and engineers, depending on your requirements. Our flexible approach has enabled us to grow consistently over the years.

ZMP is the perfect partner on any construction site. We have the right building solutions for you, whether you require a team/subcontractor of Plumbers, Bricklayers, Roofing, Plasterers, Decking and Tiling.

The company prides itself on its ability to deliver quality workmanship on projects.

ZMP has proven record of completing projects on time, on budget and to the satisfactory quality and design criteria.

Our modular buildings give an ideal alternative to conventional structure thanks to their advantages of efficient in-house factory production system, short time assembling and economic prices.

Prefabricated Modular Libraries

ZMP has constructed various community libraries designed to meet client needs. The libraries are based upon an open system which provides modular panels that can be constructed by emerging contractors quickly and with ease. ZMP designs libraries that are versatile, suitable for informal communities, cities, rural and urban communities alike.

The prefabricated buildings comprise of modules that are assembled at the factory, where structures and insulation are combined with external and internal walls. Once the modules are delivered to site, they can then be assembled within a very short time period.

The open air-conditioned library is complete with library shelves and include public areas, an internet café, a reading room, reception area, offices, kitchen, an ablution block and storeroom. Some of the interior features includes air conditioners, non-slip carpets and fire detectors. Adequate windows incorporated into the facades ensure a bright, airy feel to these spaces of research and learning.

The entire building process is supervised by a dedicated project management team consisting of structural engineers, architects, and construction managers.

With our dedicated and professional teams, ZMP is able to design, manufacture, build and service the required infrastructure through out all Government and private portfolios, to each clients individual specifications at all levels.
